Education

Galgotias College of Engineering and Technology, Greater Noida, U.P.

B.Tech - Computer Science and Engineering (2022 – 2026) | **CGPA: 7.8**

City Montessori School, Lucknow, U.P.

- Class XII - ISC (2021) | Percentage: **92%** | Class X - ICSE (2019) | Percentage: **96%**

Relevant Coursework: DBMS, Compiler Design, Operating Systems, Object-Oriented Programming, Machine Learning

Technical Skills

- **Programming Languages:** Java, Python, Javascript, TypeScript
 - **Backend:** Node.js, SpringBoot, REST APIs, JWT, WebSockets, Express.js
 - **Frontend:** React.js, Next.js, Tailwind, HTML/CSS
 - **Databases:** PostgreSQL, MongoDB, Convex, MySQL
 - **Tools & Platforms:** Git, Github, Docker, Postman
 - **Concepts:** Data Structures & Algorithms, OOP, MVC, System Design
-

Experience

Capgemini – Associate Consultant Trainee

(Jan 2026 – Present)

- Completed intensive technical training in **Java Spring Boot, REST API design, JUnit testing**, and Agile methodologies as part of the Capgemini campus hire program
- Built and Presented a **Project Management System** (Spring Boot + MySQL + Thymeleaf) as part of a 5-member team to Capgemini's Technical Consultant as part of the Training Program.

HotFoot Technology Solutions - Backend Developer

(Apr 2025 - June 2025)

- Worked on **Loan Origination System (LOS)** development and testing for AU Small Finance Bank's core application, **Rapid**, impacting loan processing efficiency for **5,000+** daily transactions
 - Collaborated with the backend development team to **analyse and break down** assigned tasks, improving clarity and reducing task completion time by **~10%**
 - Developed and integrated a **Node.js file upload module** to securely handle customer documents, ensuring compliance with validation rules and streamlining file processing for **CRs and bug fixes**
-

Projects

Project Management System – Java, Spring Boot, MySQL, JPA/Hibernate, JUnit, Thymeleaf

[GitHub](#)

- Built production-grade **REST API backend** with Spring Boot for a collaborative task and project management app; implemented **JWT-based auth, role-based access**.
- Designed a many-to-many bridge entity pattern (TaskCategory, TaskCategoryId) and implemented **JPA relationships** for clean data modelling across 10 normalized database tables
- Tested the Tasks APIs using JUnit, ensuring endpoint correctness and error handling leading a 5-member team

ZenHub - TypeScript, Next.js, EdgeStore, Convex, Clerk

[Github](#) | [Live](#)

- Developed a **full-stack document management system** providing a better, faster productive space to more than **50+ users**
 - Designed **real-time publishing** feature, allowing users to share their work live on the internet.
 - Integrated a **feature-rich text editor** supporting advanced formatting, boosting productivity.
 - Executed **document nesting** for improved organization and navigation.
 - Optimized database calls, by using a real-time database, reducing request latency **20%**
-

Certifications

- **Database Programming with SQL** – Oracle (Top 2% scorer in final assessment)
- **Complete Web Development Bootcamp 2024** – Udemy (10+ hands-on projects completed)
